SYMBOLOGY INTERNAL USE ONLY

INVOICE #_____　KEYED BY _____　CHECKED BY _____

GTIN 12 (U.P.C.)

Universal Product Code - The standard bar code symbol for retail use in the United States/Canada

1. Cust Spec. # - Assigned by Symbology for special or unique bar codes designed for you.

2. Bearer Bar Width - Optional, typically used in flexographic printing. Common sizes are first two digits of magnification i.e. 100%=.10", 90%=.09".

3. Magnifaction Factor - Industry standard for determining size i.e. 80% - 200%.

4. Bar Width Adjustment - Loss/gain adjustment of the nominal bar width dimension on film masters or printing plates to compensate for print gain which occurs in wet ink printing processes.

5. Version - A=12 Digit Code, E=Zero suppressed (8 digits).

6a. Number System - The first character of the company prefix number.

6b. The next five characters of the company prefix number.

7. Item Number - This 5-digit number is assigned by the product manufacturer.

8. Check Digit -This digit (from 0-9) is the result of a mathematical calculation using the previous 11 digits. If you do not know this number leave it blank. We will calculate.

9. Supplement - Some companies use a 2 or 5 digit extension for additional information.

10. Description - Used to identify the individual codes, for user reference only.
