Interleaved 2 of 5 - (I 2/5) A numeric-only bar code that must contain an even number of digits.

See ANSI/AIM X51 USS I 2/5 for specifications.

1. Cust Spec.# - Assigned by Symbology for special or unique bar codes designed for you.
2. Bearer Bar Width - Optional, typically used in flexographic printing.
3. Narrow Bar - "X" Dimension - The nominal dimension of the narrow bars/spaces.
4. Ratio - Between 2.2 - 3.0, designates the difference in width between the wide and narrow bars/spaces in the symbol.
5. Bar Height - Minimum of .2" or 15% of the symbol length, whichever is greater.
6. Bar Width Adjustment - Loss/gain adjustment of the nominal bar width dimension on film masters or printing plates to compensate for print gain which occurs in wet ink printing processes.
7. Encodation - Must be even number of digits.
8. Description - Used to identify the individual codes, for user reference only.
