Code 3 of 9 - *A full alphanumeric character set plus 7 special characters. See AIM/Code 3-9*

1. Cust Spec. # - Assigned by Symbology for special or unique bar codes designed for you.

2. Bearer Bar Width - Optional, typically used in flexographic printing.

3. Narrow Bar -**"X" Dimension** - The nominal dimension of the narrow bars/spaces.

4. Ratio - Between 2.2 - 3.0, designates the difference in width between the wide and narrow bars/spaces in the symbol.

5. Bar Height - Minimum of .2" or 15% of the symbol length, whichever is greater.

6. Bar Width Adjustment - Loss/gain adjustment of the nominal bar width dimension on film masters or printing plates to compensate for print gain which occurs in wet ink printing processes.

7. HIBC - Represents a "Health Industry Bar Code" with a calculated check digit. (Y=Yes, Blank=No).

8. Encodation - The combination of characters that make a bar code symbol.

9. Description - Used to identify the individual codes, for user reference.
