Data Matrix

1. Cust Spec. # - Assigned by Symbology for special or unique bar codes designed for you.
2. Width & Height Dimension - Enter the square/rectangle dimension in inches or type in the X dimension.
3. Bar Width Adjustment - Loss/gain adjustment of the nominal bar width dimension on film masters or printing plates to compensate for print gain which occurs in wet ink printing processes.
4. Encodation - The combination of characters that make a bar code symbol.
5. Description - Used to identify the individual codes, for user reference only.
