# GTIN 14 (ITF-14) - GSI Shipping Container Code in the Int. 2/5 format. See UCC/ANSI/UCC6 for specifications

1. Cust Spec. # - Assigned by Symbology for special or unique bar codes designed for you.
2. Bearer Bar Width - Generally .19" in width for direct printing on corrugated.
3. Mag. Factor- Industry standard for determining size i.e. 50%-100%. for direct on corrugated, 25% - 100% for all other printing processes.
4. Narrow Bar - "**X" Dimension** - The nominal dimension of the narrow bars/spaces. Specification range: .010" - .04."
5. Bar Height - Bars/spaces. 1.25" for 50% - 100%, Sizes below 50% are proportional.
6. Bar Width Adjustment - Loss/gain adjustment of the nominal bar width dimension on film masters or printing plates to compensate for print gain which occurs in wet ink printing processes.
7. Package Indicator - 1 digit number (0-9) assigned by individual manufacturer to represent level of packaging.
8. Country Flag/Number System - 2 digits (US or Canada 00, 03, 06, or 07).
9. Manufacturer Number - 5 digit number assigned to product manufacturer, does not include the leading number system character.
10. Item Number - This 5-digit number is assigned by the individual manufacturer.
11. Check Digit - This digit (from 0-9) is the result of a mathematical calculation using the previous 13 digits. If you do not know this number leave it blank. We will calculate.
12. Description - Used to identify the individual codes, for user reference only.
