Code 128 - *A full alphanumeric bar code capable of encoding all 128 ASCII characters.*
See ANSI/AIM X5-4 USS128 for specifications.

1. Cust Spec. # - Assigned by Symbology for special or unique bar codes designed for you.

2. Bearer Bar Width - Optional, typically used in flexographic printing.

3. Narrow Bar - **"X" Dimension** - The nominal dimension of the narrow bars/spaces.

4. Bar Height - Height of bars and spaces only.

5. Bar Width Adjustment - Loss/gain adjustment of the nominal bar width dimension on film masters or printing plates to compensate for print gain which occurs in wet ink printing processes.

6. Subset - Choice of A, B, or C. A&B are alphanumeric plus special characters, while C is an even number of numeric characters only.

7. Encodation - The combination of characters that make a bar code symbol.

8. Description - Used to identify the individual codes, for user reference only.
